WOMAN SICK TWELVE YEARS

Wants Other Women to Know
How She Was Finally
Restored to Health.

Louisiana, Mo.:—"I think a woman naturally dislikes to make her troubles known to the public, but complete restoration to health means so much to me that I cannot keep from telling mine for the sake of other suffering women."

"I had been sick about twelve years, and had eleven doctors. I had dragging down pains, pains at monthly periods, bilious spells, and was getting worse all the time. I would hardly get over one spell when I would be sick again. No tongue can tell what I suffered from cramps, and at times I could hardly walk. The doctors said I might die at one of those times, but I took Lydia E. Pinkham's Vegetable Compound and got better right away. Your valuable medicine is worth more than mountains of gold to suffering women."

—Mrs. BERTHA MURF, 508 N. 4th Street, Louisiana, Mo.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

We Invite You

to call and make a personal inspection of our Sheridan St. milk depot. We shall be glad to see you, because we know you'll be convinced that cleanliness, scientific methods, and care in delivery could not well be carried further.

We deliver an absolutely pure milk.

MAUI CHAMBER OF COMMERCE PUSHES CAMPAIGN FOR WHARVES

Names Delegates to Take Part in Civic Convention to Be Held Under Auspices of the Hilo Board of Trade Sept. 12 — General News from Maui Island.

(Special Star-Bulletin Correspondence)

WAILUKU, Aug. 10.—An important meeting of the Maui Chamber of Commerce took place this week. Twenty-four members were present, and several matters of business were brought up. A lengthy discussion was brought about by the introduction of a letter from Marston Campbell of the harbor commission in reference to the Kahului and Kihel wharves. Many people spoke upon the matter, some favoring the purchase by the government of the Claudine wharf at Kahului and some insisting that the Kihel wharf should be immediately constructed. At last Mr. Pogue moved that the entire matter be placed in the hands of a special committee of three, who would confer with the harbor commission and see to it that something definite be accomplished in reference to both wharves. The president of the chamber, Frank F. Baldwin, appointed W. F. Pogue, D. H. Case and D. C. Lindsay as the special committee.

The Hilo Board of Trade invited the Maui Chamber of Commerce to send delegates to take part in their civic convention which is to be held in Hilo on September 12. Five delegates were then by vote appointed by the chamber to represent the Maui body. These delegates are as follows: D. C. Lindsay, to represent the interests of commerce and banking; H. A. Baldwin, sugar and pineapple industry; W. F. Pogue, land and water transportation; L. W. Tempy, cattle ranching; W. O. Alken, homesteads and small farming. W. H. Field was also appointed a delegate to represent the subject of tourist travel. Also the appointment of a delegate to represent the rubber industry was authorized.

W. F. Pogue stated the various sums appropriated for improvements by the Maui Loan Fund Commission, and asked for the advice of the chamber.

Some discussion followed the proposition of spending \$77,000 for the Keane-Nahiku road; it was explained that the cost of this new road would be much less than the road from Kailua to Keane, and for this reason it had seemed best to the commission to work at this road first. On the call of the chair, it was found that the chamber favored the plan as proposed by the commission to begin on the Keane-Nahiku road first.

Mr. and Mrs. A. C. Warner are back from Honolulu. Mr. Warner has been working with E. E. Batelle, formerly the Wailuku Sugar Company's chemist, who is experimenting at Ewa with raw sugar. Samples of the raw sugar made into white have been received on Maui recently, and it looks more and more as if Batelle's process were sure to succeed. Mr. Warner is most hopeful over the prospects.

W. T. Robinson has torn down the fences in front of the residences of Enos Vincent, Hugh Howell and W. S. Chillingworth. The improvement is great. The old fence in front of the Kaahumanu parsonage is also down, so that it looks as if the prophecy of a no-fence Wailuku were beginning to be fulfilled. Little by little the unsightly and useless means of protecting the yards from stray horses and cattle are being done away with. The laws concerning roaming horses and loose cattle should be strictly enforced, so people will feel free to take down all the fences.

Frank E. Howes, the energetic salesman of the Associated Garage, was on Maui for a week, and made some handsome sales while here.

Mrs. H. P. Baldwin has completed the improvements in her Maluhia home. The house is most attractive. Ohia is used for the floors, and some unusually handsome koa was worked into very artistic panels around the living room and library. The stair case is also finished in koa. Mrs. Baldwin has also completed moving her furniture from the Spreckelsville home at Maluhia, and will make this her permanent home from now on. Her many friends will rejoice that the new home is so beautiful, and that she is now settled in it. The outlook from the lanais is one of the finest on Maui. The air is delightfully cool. The grounds and garden have been put into first-class condition by workmen, and some of the finest fruit on Maui is grown on this place. Much of the tree planting had been done under Mr. Baldwin's direction during the last few years of his life, when he and Mrs. Baldwin used Maluhia as their summer home.

Judge Guy S. Goodness has been re-appointed as district magistrate for the Makawao district. Judge Goodness first held court at Ulupalakua, and was so acceptable as a magistrate there, that later he was transferred to the Makawao district. Here he has been doing exceptionally good work, having studied hard at law, and given many excellent decisions, which together with the regular work of the

district that comes under his jurisdiction proves him to be most capable for the office. The residents of the whole region are pleased with the re-appointment, as well as other Mauiters who know the judge well.

C. E. Myers, the County surveyor, has been working at Hana during the last ten days, surveying the line for the Hana water works. The Maui Loan Fund Commission has appropriated \$15,000 for this project. Hugh Hawaii is now in Hana, and both men with assistants having pushed the work well along. The line will begin at the Waiho spring, and a four inch pipe will be laid from that point, supplying the whole of Hana with an excellent water supply. There is a rumor to the effect that a small electric plant will also be installed, and that the power will be sold at a reasonable rate throughout Hana. The water will surely have head enough to develop electric power, and it would certainly be a splendid thing for the town if light could be obtained.

At the recent meeting of the Maui Chamber of Commerce several new members were elected. Among them are Harold W. Rice, John E. Gannon, C. C. Clark, C. E. Copeland, Enos Vincent and Victor C. Schoenberg.

The district overseer of Hana has been authorized to install an acetylene gas plant for lighting the courthouse of Hana, also the jail and the streets of that town. This plant will not be necessary if the proposed electric power is generated by the new water system that the County is now working on.

The Estate of Clarence M. Roberts was settled this week on Wednesday. H. B. Penhallow has been the administrator. His accounts were examined and approved, and he was discharged.

The Harvest Home festival at Punene has been postponed one week on account of the steamship strike in Honolulu. The work of the committees was practically done, and nearly everything was ready for the pleasure of this eventful day on Maui. The affair will be held next week Saturday.

PROBLEMS IN MASTERY OF AIR WORKED OUT

LONDON, July 25.—The report of the advisory committee for aeronautics for the year 1911-12 contains a general survey of the work carried out by the committee during the year in question. The committee, it will be remembered, was appointed to advise generally on the scientific problems arising in connection with the work of the admiralty and was office in aerial construction and navigation.

As a result of experiments made in the small water channel employed, with the aid of colored streams, it was found that the flow in the tail region of an elongated model was very slow. A model was accordingly prepared in which successive sections of the tail were removable, and it was found, as expected, that the effect of the removal of these portions was almost negligible. The advantage of this discovery lies in the fact that the tail may be rounded off or otherwise modified without loss of speed and with a gain in lifting power.

Experiments were also carried out at the Royal Aircraft factory, in order to determine the head resistance of eight different airship forms. The models were made of goldbeaters' skin and were about 18 feet in length and three feet in diameter. These models were towed horizontally through the air at different velocities, the speed being obtained by means of a falling weight. As a result it was concluded that in a completed airship the ratio of length to maximum diameter might be reduced to about 5-12 to 1.

Tests were also carried out on various fabric's and it is interesting to note that a yellow coloring was found particularly beneficial, as the loss of tensile strength in unprotected or badly protected fabrics was much greater than in the cloths covered with yellow pigment.

Various full scale experiments with aeroplanes were carried out under the direction of the superintendent of the Royal Aircraft factory in order to determine the effect of various modifications in an existing machine, and it was found that the alterations made resulted in a marked improvement in ease of control, stability and speed, with increase of available lift.

According to the report a further program of full scale work had been prepared for the coming year, including the construction of experimental aeroplanes of various types, in order that their relative advantages and characteristics might be examined with a view to the continued improvement of existing machines.

Doctors Use This for Eczema

Dr. Evans, Ex-Commissioner of Health, says: "There is almost no relation between skin diseases and the blood. The skin must be cured through the skin. The germs must be washed out, and so salves have long ago been found worthless. The most advanced physicians of this country are now agreed on this, and are prescribing a wash of wintergreen, thymol and other ingredients for eczema and all other skin diseases. This compound is known as D.D.D. Prescription for Eczema."

Dr. Holmes, the well known skin specialist writes: "I am convinced that the D.D.D. Prescription is as much a specific for eczema as quinine for malaria. I have been prescribing the D.D.D. remedy for years. It will take away the itch the instant you apply it."

In fact, we are so sure of what D.D.D. will do for you that we will be glad to let you have a \$1 bottle on our guarantee that it will cost you nothing unless you find that it does the work.
